Predictive Services Discussion

Dry thunderstorms are possible in the Northwest, northern Great Basin, and western Montana through Wednesday. Wetter storms will develop over the southern Great Basin, Southwest, and southern California. A warming and drying trend will continue over much of the West through mid-week. Dry and unstable conditions (high Haines Index) will exist from eastern portions of Washington and Oregon into western Montana the next couple days.

OPERATIONAL BRIEFINGS

Operational briefings are critical to safe fire operations. To ensure a consistent and effective briefing, a standardized briefing checklist should always be used. The following checklist is printed on the cover of the NWCG Incident Response Pocket Guide:

● Situation:

- Fire name, location, map orientation, other incidents in the area
- Terrain influences
- Fuel type and conditions
- Fire weather (previous, current, and expected)
- Fire behavior (previous, current, and expected)

● Mission/Execution:

- Command (Incident Commander/immediate supervisor)
- Commander's intent
- Specific tactical assignments
- Contingency plans

● Communications:

- Communication Plan (tactical, command, air/ground frequencies, cell phone numbers, etc.)
- Medivac Plan

● Service/Support:

- Other resources that may be working adjacent to you and those available to order
- Aviation operations
- Logistics (e.g., transportation, supplies, equipment)

● Risk Management:

- Identify known hazards and risks
- Identify control measures to eliminate hazards and reduce risk
- Identify trigger points for disengagement or reevaluation of operational plan

● Questions or Concerns
